WORK EXPERIENCE

Skyspecs   **Jan. 2022 – Present**
Solutions Engineer   *Ann Arbor, MI*
- Implemented process improvements and training surrounding git, Horizon API, Sisense Elasticubes, and ETL processes
- Replaced aging data models with updated BI Data ECs for several customers, resulting in increased data quality with no loss in functionality
- Developed custom web scraper to support customer data backups for images and metadata stored in Horizon

Magellan Health   **Jan. 2020 – Jan. 2022**
Senior Data Analyst   *Remote*
- Developed and implemented a solution for identifying, correcting, and monitoring discrepancies between multiple complex data sources to ensure data integrity
  - Identified and communicated root cause of discrepancies to relevant stakeholders
- Created reports, visualizations, and analysis using data from various sources using tools such as Alteryx, SQL, and Python
- Led implementation of a document management solution to improve the process surrounding management of client data
- Served as a subject matter expert in matters related to drug data, formulary management software, data quality/integrity practices, ETL processes, and general process improvement

Decision Resources Group   **Dec. 2016 – Jan. 2020**
Solution Analyst   *Overland Park, KS (Remote)*
- Responsible for process improvement, documentation, planning, and other interventions to provide solutions in areas struggling to adapt to a growing pharmacy data management software business.
  - Lead the efforts to audit and overhaul insufficient processes for quality assurance and ticket writing.
- Participated in identifying requirements for design and data model of future products by combining customer data, product knowledge, and industry experience.
- Contributed to a variety of projects regarding database maintenance, quality assurance, customer service, requirements documentation, ETL processes

MeridianRx   **Mar. 2015 – Sep. 2016**
Formulary Management Team Lead   *Detroit, MI*
- Lead a team of five analysts managing formulary data for multiple clients across multiple lines of business for a mid-size PBM.
- Ensured data quality, timely submission, client satisfaction, regulatory requirements were met for a variety of data, reports, and RFPs.
- Participated in gathering and documenting requirements for a brand new in-house formulary data management software suite.

EDUCATION

Western Michigan University   **Graduated Sep. 2013**

Bachelor of Science, Behavioral Sciences   *Kalamazoo, MI*

- Teacher's assistant for Applied Animal Behavior Practicum at the Kalamazoo County Animal Shelter
- Research assistant responsible for collecting data regarding procedural interventions at an adult care facility
